

## EUROPAK PACKAGED PLANTROOMS & CUSTOM BUILD PACKAGES

Eurofluid has 25 years of experience in the design and manufacture of packaged equipment for the HVAC, Process, Industrial and Building Services markets and is a specialist in the management of multidiscipline projects from conceptual design to project completion.

Using our partnerships with the top European manufacturing brands, our design, production and service departments work closely together as a highly flexible integrated team, in order to deliver a quality product on-time and within budget.

Along with our ability to understand our clients requirements, our experience and expertise are fundamental to our success and we have established an unrivalled reputation for top quality packaged solutions.

- Self-supporting structures are manufactured for weatherproof installation
- Maintenance from inside or outside the equipment
- Eurofluid utilise the latest technologies from the major European brands
- Power outputs up to 2,715 Kw in a single section
- Hot water generation for heating and/or domestic hot water in centralised installations
- Natural gas or LPG operation
- A high efficiency solution for the residential, hotel, commercial and service sectors

**Europak Packaged Plantroom options can include;**

- Boilers,
- Gas Detection,
